Ilenia Epifani - DMAT

Nikolas Galli - DICA

Andrea L'Erario - DABC

Stefania Landi - DABC

Lorenzo Mari - DEIB

Paco Vasco Aldo Melià - DEIB

Maria Cristina Rulli - DICA

PROJECT

ECHOES-Nosedo aims to quantify the role of the ancient agricultural practice of Lombard water-meadows ("marcite") in strengthening environmental and sociocultural resilience. The ECHOES Lab, a participatory field laboratory at Cascina Nosedo, contributes to this and other goals, including: the promotion of dialogue and mutual learning between the local community and the environment; applying conservative restoration to small hydraulic artifacts; creating an itinerary from Nosedo to Chiaravalle with signage to learn about the values of the marcita; co-building open educational paths dedicated to knowledge and care of the landscape.

PARTNERS

IIS "S. Allende" and IIS "E. Torricelli" (schools)
Milano Bicocca University
Montana S.p.A.
ATI Soc. Agr. Ubertone M. & P.; Az. Agr. Arioli
cugini; Az. Agr. G. Ubertone (farms)
Associazione Nocetum
Osservatorio del Lambro
Associazione Parco Agricolo del Ticinello
Associazione Amici Cascina Linterno

CONTEXT

Off Campus Cascina Nosedo
South Milan Agricultural Park (Milan)

START DATE

January 2025
